Education

Indian Institute of Information Technology, Dharwad
Bachelor of Technology - Data Science and Artificial Intelligence

2021 – 2025
CGPA: 8.6

Experience

Oracle
Application Software Engineer

July 2025 – Present
Bangalore, KA

- Architected a production-grade **agentic observability platform** using **LangGraph** state-machine workflows and **OCI GenAI**, built distributed **AI microservices** for context enrichment, incident summarization, runbook generation, and output validation, reducing mean incident resolution time by **60%**.
- Built an enterprise **RAG pipeline** with **REST APIs** grounding LLM responses in live customer metadata; implemented a structured validation loop cutting hallucinated steps by **40%**. Exposed services as **MCP tools** and **A2A JSON-RPC** skills via **FastMCP** and **A2A SDK**, with **Oracle DB** caching and **SSE streaming**.
- Designed a **load testing** framework using **k6** across **6+ critical systems** to identify scalable system bottlenecks; tracked and resolved **25+ high-priority bugs** ahead of the production rollout via **CI/CD** pipelines.

Oracle
Project Intern

Jan 2025 – July 2025
Bangalore, KA

- Built a UI and API test automation framework from scratch using **Playwright** and **TypeScript**, integrated into the **CI/CD** pipeline with scheduled runs and automated email reports, supporting **650+ active customers** across multiple service types and cutting manual regression effort by **80%**.

Machine Learning Intern, IIIT Dharwad
Mentored by Prof. Dr. Animesh Chaturvedi

Jan 2024 – Sept 2024
Dharwad, KA

- Benchmarked 5 LLMs (mBart50, M2M100, NLLB-200, Google Translator, IndicTrans2) using BLEU, STS, chrF, and METEOR scores across **1M+ translated sentences**, achieving a **15%** improvement in translation accuracy for Indian languages; this work contributed to a research publication.

Projects

Ghar Jaisa
Full Stack Food Delivery Application

GitHub | Demo

- Architected a **microservices-based** food delivery platform with real-time event handling; features **voice ordering**, **real-time map tracking**, customizable menus (toppings, sizes, dietary filters), **multi-method payments** (cards, wallets, COD), live delivery notifications, and an **admin portal** for menu, order, and sales management.

Insight Mate
AI-Powered Analytics Assistant – Hackathon Winner (GangliaTech)

GitHub

- Built a **multi-modal AI application** integrating **9 distinct AI/ML capabilities** (object detection, pose estimation, NLP chatbot, barcode scanning, voice search, digital ink recognition, text-to-image, and image search) into a single **Flutter** app with a **FastAPI** backend.

Connext
Group Video Conferencing Application

GitHub | Live

- Built a real-time group video conferencing app (up to **7 participants**) with a **WebRTC** peer-to-peer mesh architecture and Agora SDK for signaling; supports screen sharing, in-session text chat, and participant management (mute, speaker detection, tracking).

Technical Skills

Languages: Python, C/C++, JavaScript, TypeScript, SQL
Frameworks: FastAPI, LangGraph, LangChain, Node.js, Express.js, Flutter
Databases: PostgreSQL, Oracle DB, MySQL, MongoDB, OpenSearch
Tools: Docker, Kubernetes, Helm, Playwright, k6, Postman, Git, GitHub, Linux

Achievements

- Published at ACM/IEEE AIMLSystems 2025:** Co-authored “Cloud Architecture for Language Translation Model as a Service (MaaS) on Hugging Face” accepted at the *5th ACM/IEEE International Conference on AI ML Systems*.
- Amazon ML Summer School 2023:** Selected as 1 of 3,000 participants from 85,000 applicants - certificate.
- Solved **850+ DSA problems**; currently **Knight**-ranked on LeetCode. Authored **DSA Patterns You Need to Know** on LeetCode Discuss – ranked in the **top 10 most upvoted articles of all time** on the platform.
